Introduction

The purpose of the Annual Planning Information publication for 1985 is to provide planners with labor market information that will be helpful in the development of service delivery area plans. The publication is divided into fourteen sections according to service delivery area. An appendix follows the last service delivery area section.

Each service delivery area section contains a description of the area and a narrative of highlights and conclusions which is based on information found in the seventeen tables following each narrative. The tables contain data on population, labor force, education, wages and income levels, occupational projections, unemployment insurance claimants, and work disability status. A detailed list of tables follows this introduction.

The appendix is divided into six sections. The first two sections are footnotes and references for the tables. The next two sections are names and addresses of all the Job Service offices and Unemployment Insurance offices in each service delivery area. The fifth section is a list of the Research and Statistics field analysts and the service delivery area(s) for which they are responsible. The last section contains the names of the central office Labor Market Information staff. If further information is needed concerning this publication, the field staff person or the central office staff should be contacted.

Description of the Area

Service Delivery Area 1

Service Delivery Area 1 is located in upper east Tennessee and is made up of Carter. Johnson, Sullivan, Unicoi, and Washington counties. Together these five counties encompass an area of 1,543 square miles.

Much of Service Delivery Area 1 is mountainous terrain characteristic of the Appalachian region. These mountains have had a continous influence on the region's settlement and economy, beginning when the first settlers, arriving from the northeast, were forced by the rugged terrain to enter the area via the Cumberland Gap. Even now a new industry's choice of location is affected by the terrain. Most industries find that the area's valleys, which contain level land and major rivers, are the most desirable sites for industrial development. The valleys are also more conducive to efficient transportation systems. The Service Delivery Area 1 has a total population of 313,035, and 54.2 percent of that population is considered rural.

Highlights and Conclusions

Service Delivery Area 1

Recent economic trends in Service Delivery Area 1 are typical of an economy recovering from a recession. Manufacturing was harder hit than nonmanufacturing and was slower to recover when the economic structure began to improve. According to the 1983 annual average data, nonmanufacturing employment increased from 58,730 to 61,710, a change of 5.1 percent from 1982 to 1983, while manufacturing employment decreased 38,960 to 38,650, a change of 0.8 percent. Total nonagricultural wage and salary employment increased from 97,690 to 100,360 during the same time period, a 2.7 percent change. A comparison of occupational employment projections for 1984 to 1990 shows an increase in employment in all categories. Employment in services shows the greatest growth rate, an increase of 12.7 percent. With all areas showing increases, the economic outlook through 1990 is encouraging.

The population of Service Delivery Area 1 is expected to increase from the 1980 level of 313,035 to 328,702 by 1984, a change of 5.0 percent. Of the projected number, 159,433 will be males and 169,269 females. Also, 8,481 of these are projected to be members of a minority group.

The civilian labor force in Service Delivery Area 1 is expected to decrease from the 1980 level of 139,903 to 133,270 by 1984. This change is a decrease of 4.7 percent. Employment is expected to drop from 129,136 to 118,877, a change of 7.9 percent while unemployment is expected to increase from 10,767 to 14,393 or 33.7 percent. Of the total labor force, 56.9 percent will be male and 43.1 percent female. The minority proportion of this labor force is expected to be 2.4 percent in 1984.

According to the 1980 Census, the number of 16-21 year olds in the labor force was 17,298. The number of 16-21 year olds in the 1984 labor force is expected to be 13,225, a decrease of 23.5 percent.

In 1980 Service Delivery Area 1 had 40,883 persons listed as high school dropouts; 2.8 percent of these were minorities. High school graduates numbered 83,275. The area had 13,156 single heads of households; 18.4 percent of these were male and 81.6 percent were female. A total of 22,990 persons were considered work disabled in 1980; 2.8 percent of these were male and 47.2 percent were female.

The characteristics of active applicants drawing unemployment insurance benefits in Service Delivery Area 1 during the first quarter of 1984 indicated that the male-female ratio was approximately 50-50. The majority were white, were between 22 and 45 years of age, and had some high school education. The major areas of unemployment were in the clerical and sales, structural work, and service occupation fields.

Description of the Area

Service Delivery Area 2

The counties of Claiborne, Cocke, Grainger, Greene, Hamblen, Hancock, Jefferson, Sevier, and Union make up Service Delivery Area 2. This region is located in the northeastern portion of the state and is bordered by the states of Kentucky and Virginia.

This area of the state is noted for its gently rolling landscape and majestic mountain peaks. The valleys below house a variety of economic activities including coal mining in Claiborne County, the world's largest burley tobacco market in Greene County, and the beautiful resort area of Gatlinburg in Sevier County.

A large number of lakes in the region provide excellent recreational facilities as well as adequate electric power to meet the needs of a variety of manufacturing activities.

Among the kinds of products manufactured in the region are furniture, textiles, chemicals, apparel, fabricated metal products, paper products and electrical components.

Highlights and Conclusions

Service Delivery Area 2

In general, Service Delivery Area 2 is showing signs of recovery from the recent recession. Many of the counties in the region have shown an increase in population and an expanding labor force while maintaining an unemployment rate within a few points of the state rate. Cocke County, however, had one of the highest unemployment rates in the state and averaged 24.9 percent during 1983. Total nonagricultural employment increased from 7,350 in 1982 to 7,780 in 1983, a change of 5.9 percent. Manufacturing employment increased from 3,420 to 3,550, a 3.8 percent change. Nonmanufacturing employment also increased by 7.6 percent from 3,930 to 4,230. Total employment for 1984 to 1990 is projected to increase from 104,740 to 109,160, a change of 4.2 percent. An increase is expected in every broad occupational category. The occupations with the largest projected increases are service and sales and clerical workers.

The population of Service Delivery Area 2 is expected to increase from 308,907 in 1980 to 334,460 in 1984, an 8.3 percent change. Males will number 163,152 and females 171,308. The black population will total 6,927 with other minorities amounting to 1,887 in 1984. Minorities will account for 2.6 percent of the population.

The civilian labor force of Service Delivery Area 2 is expected to increase from 132,309 in 1980 to 136,130 in 1984, a 2.9 percent increase. Employment is expected to decline slightly, and the unemployment rate is expected to increase from 9.7 percent in 1980 to 13.7 percent in 1984. Of the total labor force, 57.3 percent will be male and 42.7 percent will be female. The minority proportion is expected to be 2.5 percent of the total labor force or 3,380. According to the 1980 Census, the number of 16-21 aged persons in the labor force for the area was 15,868. The projected number in the labor force in 1984 will be 15,039, a 5.2 percent decrease.

In 1980 the region had 113,375 persons listed as high school dropouts; 1.8 percent of these were black. Single heads of household numbered 12,661; females were 78.9 percent of that number. A total of 24,992 persons had a work disability; 52.4 percent were male and 47.6 percent were female.

The characteristics of active applicants in the area drawing unemployment insurance benefits for fourth quarter of 1983 indicated that 48.5 percent were male and 51.5 percent were female. The majority were white, had some high school education, and were between the ages of 22 and 45. The major areas of unemployment were in the following occupations: benchwork, clerical and sales, services, and structural work.

Description of the Area

Service Delivery Area 3

Service Delivery Area 3, which consists of Knox County, serves as the main regional center for banking, wholesale and retail trade, higher education, and health services for east Tennessee and parts of Virginia, Kentucky, and North Carolina.

Knox County's economy is heavily weighted toward nonmanufacturing with approximately 80 percent of total employment in nonmanufacturing and 20 percent in manufacturing. This employment mix tends to insulate Knox County from recessionary pressures. The Knox County area is a center for government, services, and finance, insurance, and real estate activity. These industries are relatively unaffected by downturns in the general business cycle. According to the Tennessee Statistical Abstract (1983-84), the average per capita income in Knox County is $9,306, which is sixth from the top of the 95 counties in the state.

One of the most important resources in Knox County is its vast recreational potential. Knox County's proximity to the Great Smoky Mountains National Park, which is within a day's drive of approximately 50 percent of the total U.S. population, and to other historical sites and convention facilities has led to the development of a vigorous tourist trade. Tourism and recreation and their related business activities have expanded significantly in recent years and are expected to continue to expand in the future.

The 1982 World's Fair was held in Knoxville from May through October 1982. Approximately 10,000 people were employed at the fair at its height. Although direct residual economic benefits derived from this project are hard to measure, perhaps the greatest benefit from this project will come later as firms are drawn to the area by the national publicity received, the revitalized central business district and highway system; the development of the Technology Corridor; and the image of a progressive, cohesive business community.

Highlights and Conclusions

Service Delivery Area 3

The economic forecast for Knox County Service Delivery Area 3 is brighter as the economy is expected to respond to a favorable economic climate. Knox County had one of the lowest average unemployment rates in 1983: 10.0 percent. Only 12 counties in the state had lower average rates. Nonagricultural employment dropped from 139,740 in 1982 to 133,700 in 1983, a change of 4.3 percent. The labor force continued to expand which resulted in higher unemployment rates. Projected employment for 1984 to 1990, however, is expected to increase from 171,560 to 187,210 or 9.1 percent. All occupational categories will show increases with the largest increases in service and clerical and sales workers. This indicates that the economy is recovering .

The population of Service Delivery Area 3 is expected to increase from 319,694 in 1980 to 334,783 in 1984 or 4.7 percent. The number of males will be 158,803 and 175,980 females will be in the area. The black population will be 29,717 with other minorities amounting to 3,238. Minorities will account for 9.8 percent of the total population.

The civilian labor force in Service Delivery Area 3 is expected to increase from 150,646 in 1980 to 156,900 in 1984, a 4.2 percent change. Employment and unemployment will also increase. The unemployment rate will increase from 6.0 percent in 1980 to 7.4 percent in 1984. Of the total labor force, 83,215 will be male and 73,685 will be female. Minorities will comprise 8.4 percent of the labor force or 13,253 persons. In 1980 the number of 16-21 year olds in the labor force in Service Delivery Area 3 was 19,694 and 8.3 percent or 1,631 were minorities. The number of 16-21 year olds in the 1984 labor force is projected to be 16,315, a decrease of 17.2 percent.

In 1980, Service Delivery Area 3 had 25,822 high school dropouts; 11.2 percent of these were black. Single heads of household numbered 13,376; 83.8 percent were female and 16.2 percent were male. A total of 19,829 had a work disability; 48.5 percent were female and 51.5 percent were male.

A comparison of active applicants in the area drawing unemployment insurance benefits for the fourth quarter 1983 showed that 47.1 percent were males and 52.9 percent were females. Minorities comprised 16.5 percent of those receiving benefits. The majority had some high school education and were between the ages of 22 and 45. The occupations with the highest unemployment rates were clerical and sales, services, and professional, technical and managerial.

Description of the Area

Service Delivery Area 4

Service Delivery Area 4 is located in the western part of east Tennessee. The area consists of 3,709 square miles, or 2,373,760 acres, and extends eastward from the Highland Rim almost 100 miles, bordering Kentucky on the north. The region goes from rolling hills in the western section to mountainous areas in the northern and eastern sections of the service delivery area.

The following counties comprise Service Delivery Area 4: Anderson, Blount, Campbell, Cumberland, Loudon, Morgan, Roane and Scott. The cities of Crossville, Oneida, Oak Ridge, Loudon and Maryville are the major centers for employment and retail outlets in the area. A number of persons commute to Knoxville from Service Delivery Area 4 for employment and retail purchases because Knoxville joins the area on the east.

Natural resources are a big asset to the area with coal deposits in almost every county, but most abundant in the northern counties of the area. Oil and natural gas wells have been developed recently, and an increased effort is being made to locate more wells. Marketable timber is located in every county, but is more abundant in the northern counties where the land is more mountainous. Limestone and marketable natural rock are also found in the area.

Highlights and Conclusions

Service Delivery Area 4

The economic outlook for Service Delivery Area 4 is improving. Total nonagricultural employment increased slightly from 78,350 in 1982 to 78,620 in 1983, a 0.3 percent change. Manufacturing employment increased 3.1 percent from 28,550 in 1982 to 29,430 in 1983, while employment in nonmanufacturing industries decreased from 49,800 to 49,180. Employment is projected to increase from 112,690 in 1984 to 124,900 in 1990, a 10.8 percent change. Employment is expected to increase in all major occupational categories with the largest increases in service workers and crafts and kindred workers.

The population of Service Delivery Area 4 is expected to increase from 321,556 in 1980 to 346,297 in 1984 or 7.7 percent. Males will make up 48.4 percent of the population or 167,714 persons and females will comprise 51.6 percent of the population or 178,584 persons. The black population will reach 7,493 persons in 1984 and other minorities will be 3,002 persons. Minorities will comprise 3.0 percent of the area's population.

The civilian labor force of the area will grow from 134,819 in 1980 to 138,410 in 1984 or 2.7 percent. Employment is expected to decline slightly, while the unemployment rate will increase from 8.9 percent in 1980 to 11.8 percent in 1984. Males will account for 57.1 percent of the labor force or 78,972 persons while females will make up 42.9 percent or 59,438. The area had 16,495 persons aged 16-21 years in the labor force in 1980. Of this number, 2.3 percent were minorities. The number of 16-21 year olds in the labor force will decrease to 14,749 in 1984, a change of 10.6 percent.

High school graduates in Service Delivery Area 4 in 1980 numbered 83,339; 42,283 did not graduate from high school. Minorities comprised 3.1 percent of the dropouts or 1,308 persons. There were 13,344 single heads of households;

81.5 percent were female and 18.5 percent were male. Persons with a work disability numbered 25,528; males accounted for 51.6 percent while females were 48.4 percent of the work disabled.

A comparison of the characteristics of those persons drawing unemployment insurance benefits during the fourth quarter of 1983 in the area showed that 48.0 percent were males and 52.0 percent were females. The majority had completed some high school and were between the ages of 22 and 45. The occupations with the highest unemployment rates were clerical and sales, services, and structural work.

Description of the Area

Service Delivery Area 5

Service Delivery Area 5 is composed of Bradley, Polk, Meigs, McMinn, and Monroe counties. Meigs County reaches farthest north and touches Roane County; Bradley and Polk counties reach south to the Georgia border.

Meigs, McMinn and Bradley counties make up an area of ridges, hills, and valleys which generally run from northeast to southwest. Most of Polk and Monroe counties lie in the Cherokee National Forest.

Agricultural activities use at least 93 percent of the land in all the counties in this service delivery area. The forest land is defined as commerical forest, which includes all land that produces or is capable of producing crops of industrial wood that are used for timber. Forestry is the major agricultural land activity throughout these service delivery area counties. Agricultural products include soybeans, tobacco and forage crops.

Highlights and Conclusions

Service Delivery Area 5

The economic outlook for Service Delivery Area 5 is encouraging. Total nonagricultural wage and salary employment increased from 48,040 in 1982 to 51,070 in 1983, an increase of 6.3 percent. Manufacturing employment rose 7.9 percent from 22,620 in 1982 to 24,000 in 1983, while employment in the nonmanufacturing sector increased from 25,420 to 26,670, a growth of 4.9 percent. Employment between 1984 and 1990 is projected to increase 7.3 percent from 63,380 to 67,980. Employment in all occupations will rise with service workers showing the greatest increase.

Population in Service Delivery Area 5 will increase from 159,158 in 1980 to 172,652 in 1984, a change of 8.5 percent. Males will make up 48.4 percent of the population or 83,566 persons and females will be 51.6 percent or 89,086 persons. Minorities will total 7,474 or 4.3 percent of the population.

The number in the civilian labor force of the area will decrease from 70,854 in 1980 to 67,870 in 1984, a change of 4.3 percent. Employment will decrease and the unemployment rate will increase from 7.9 percent in 1980 to 12.8 percent in 1984. The male proportion of the labor force will be 53.5 percent or 36,333 and females will be 46.5 percent or 31,527 persons. Minorities will comprise 3.9 percent of the labor force or 2,646 persons. The number of 16-21 year olds in Service Delivery Area 5 in the labor force in 1980 was 9,025 with a minority proportion of 4.3 percent. In 1984 7,523 persons of this age will be in the labor force, a decrease of 16.6 percent.

In 1980 the area had 38,163 persons who had completed high school while 21,304 were considered dropouts. Minorities made up 5.0 percent of the dropouts. Single heads of household numbered 6,207 in 1980; 80.1 percent were female and 19.9 percent were male. The number of persons with a work disability was 11,244; 46.9 percent were female and 53.1 percent were male.

Unemployment insurance claimants in Service Delivery Area 5 during fourth quarter of 1983 were 47.8 percent female and 52.2 percent male. The majority of the claimants were white, had completed some high school, and were between the ages of 22 and 45. The occupations with the highest rate of unemployment were clerical, structural work, and benchwork.

Description of the Area

Service Delivery Area 6

Service Delivery Area 6 consists of Bledsoe, Grundy, Hamilton, Marion, Rhea, and Sequatchie counties, which are located in southeastern Tennessee. This is a scenic area made up of mountains, valleys, and the Tennessee River, which is a major source of energy and a recreational resource. This region is the heart of the great Tennessee Valley and is widely known for coal mining and timber reserves.

Service Delivery Area 6 attributes much of its growth for the past 50 years to the Tennessee Valley Authority, with its development of electrical energy and soil conservation programs which have helped area businesses expand.

The area is served by two interstate highways. Commuter patterns between counties have improved in the past 10 years, especially from the surrounding counties to Hamilton County, which contains 78.1 percent of the total population of this service delivery area. All counties in this area except Grundy border Hamilton County, helping make Chattanooga a financial and distribution center for the area. Dayton in Rhea County and South Pittsburg in Marion County are also growth areas in the service delivery area. Each county in the area has experienced some growth in business and commerce through the development of shopping centers which provide more goods and services at the local level.

Highlights and Conclusions

Service Delivery Area 6

The economic picture for Service Delivery Area 6 is an optimistic one. Total nonagricultural wage and salary employment increased slightly from 157,050 in 1982 to 157,210 in 1983, a 0.1 percent change. Employment in manufacturing also increased from 40,500 to 41,970, a change of 3.6 percent. Employment in the nonmanufacturing sector decreased, however, from 116,550 in 1982 to 115,240 in 1983, a 1.1 percent change. Projected employment for 1984 to 1990 will increase 8.5 percent from 184,670 to 200,440. All occupational employment categories will increase with the largest gains occurring in service workers and sales workers.

The population in Service Delivery Area 6 will increase 4.3 percent from 368,261 in 1980 to 384,097 in 1984. The proportion of males in the population will be 47.4 percent or 182,023 and females will comprise 52.6 percent or 202,076 persons. Minorities will number 64,606 or 16.8 percent.

The civilian labor force will increase from 166,759 in 1980 to 169,740 in 1984 or 1.8 percent. Employment will decrease slightly and the unemployment rate will increase from 7.4 percent in 1980 to 9.5 percent in 1984. The number of males will reach 90,387 in 1984 or 53.3 percent of the civilian labor force, while the number of females will be 79,353 or 46.7 percent. The minority proportion will be 15.1 percent or 25,633 persons. The civilian labor force of Service Delivery Area 6 aged 16-21 in 1980 was 16,176 and will increase to 17,117 or 5.8 percent in 1984.

In 1980 the number of high school graduates in the area was 103,655 and the number of high school dropouts was 49,245. Minorities were 18.9 percent of the dropouts. Single heads of household totaled 18,767; females were 83.8 percent of these and males were 16.2 percent. A total of 23,407 persons had a work disability; 51.8 percent were male and 48.2 percent were female.

Unemployment insurance claimants in Service Delivery Area 6 during fourth quarter 1983 were 52.5 percent male and 47.5 percent female. The majority of these claimants were white, 22 to 45 years of age, and had completed some high school. The occupations with the highest percentage of claimants were clerical and sales, services, and structural work.

Description of the Area

Service Delivery Area 7

Service Delivery Area 7 is located in the northeastern section of middle Tennessee. The area consists of 4,414 square miles, or 2,824,960 acres, and lies within three different physiographic regions. One section of the area lies within the Central Basin in the western portion and has an average elevation of about 500 feet. The Highland Rim, which constitutes less than 30 percent of the area, lies above the Central Basin. The remaining part of the area is atop the 2,000-to 3,500-foot high Cumberland Plateau.

The following counties comprise Service Delivery Area 7: Cannon, Clay, DeKalb, Fentress, Jackson, Macon, Overton, Pickett, Putnam, Smith, Van Buren, Warren and White. The cities of Cookeville, McMinnville, and Sparta are the major centers for employment, retail outlets, and transportation.

Abundant natural resources in Service Delivery Area 7 range from coal deposits in the eastern section to zinc and limestone in the southern and western counties. Timber, another valuable resource, is abundant in all counties. A number of producing oil wells have been constructed recently, and an increased effort is being made to locate more oil and natural gas. Other resources, whose value would be difficult to measure, are the three large lakes in the area. A large number of tourists are attracted to the area because of the lakes. They are also a source of electrical power and transportation of commodities in and out of the area.

Highlights and Conclusions

Service Delivery Area 7

The economic outlook for Service Delivery Area 7 is promising. Nonagricultural wage and salary employment increased from 55,200 in 1982 to 56,950 in 1983, a change of 3.2 percent. Manufacturing employment increased from 26,550 to 27,120, a 2.1 percent change. Employment in the nonmanufacturing sector increased from 28,650 to 29,830 or 4.1 percent. Employment is projected to increase from 74,350 in 1984 to 79,230 in 1990 or 6.6 percent. Employment in all occupations is expected to increase with service workers and clerical workers showing the greatest increases.

The population in the area will increase from 212,929 in 1980 to 228,811 in 1984, a change of 7.5 percent. The number of males will be 111,809 or 52.5 percent and 117,002 or 54.9 percent will be females. Minorities will number 5,329 or 2.5 percent of the population.

The civilian labor force in Service Delivery Area 7 will decrease from 94,438 in 1980 to 94,000 in 1984, a change of 0.5 percent. The number of males will be 48,870 or 52.0 percent and 45,130 or 48.0 percent will be female. The minority proportion of the labor force will be 2.0 percent or 1,850. The area's civilian labor force aged 16-21 was 13,054 in 1980 and will decrease to 10,568 in 1984, a 19.0 percent change. Minorities aged 16-21 made up 258 or 2.0 percent of the labor force.

In 1980 the number of high school graduates in Service Delivery Area 7 was 53,296. High school dropouts amounted to 27,212 persons with 2.3 percent were minorities. Single heads of household numbered 8,230 in 1980; 78.8 percent were female and 21.2 percent were male. The number with a work disability was 17,522; 51.6 percent were male and 48.4 percent were female.

A comparison of characteristics of unemployment insurance claimants during fourth quarter of 1984 showed that 54.3 percent of the claimants were female and 45.7 were male. The majority of the claimants were white, had some high school education, and were between the ages of 22 and 45. The occupations with the highest number of claimants were benchwork, clerical and sales, and services.

Description of the Area

Service Delivery Area 8

Service Delivery Area 8 is located in the northwest portion of middle Tennessee, bordered by south central Kentucky on the north and the Tennessee River on the west. Perry, Hickman, Maury, Marshall, and Rutherford counties make up the southern border. Macon, Smith, and DeKalb counties comprise the eastern border.

Service Delivery Area 8 consists of the following counties and their respective principal cities: Cheatham County, Ashland City; Dickson County, Dickson; Houston County, Erin; Humphreys County, Waverly; Montgomery County, Clarksville; Robertson County, Springfield; Sumner County, Gallatin; Stewart County, Dover; Trousdale County, Hartsville; Williamson County, Franklin; and Wilson County, Lebanon.

Service Delivery Area 8 is predominantly rural but differing in terrain from east to west. The eastern portion of this region boasts of purple-tinted hills and mountains covered with tall evergreens of many varieties. In contrast to this are the fertile, rolling plains in the west yielding abundant crops of tobacco, wheat, and soybeans.

Although this area was once considered an agricultural area, home of the largest dark-fired tobacco center in the world, Service Delivery Area 8 now flourishes with many businesses and industries. Adequate labor, TVA power, navigable waterways, rail and air connections, proximity to markets, and above average living conditions have brought many new industries to the area. These new industries have provided many jobs which have enhanced the quality of life to people in Service Delivery Area 8, as well as aided in the gradual decrease in unemployment and the increase in job security in the area.

Highlights and Conclusions

Service Delivery Area 8

The economic outlook for Service Delivery Area 8 is favorable. Nonagricultural wage and salary employment increased from 89,140 in 1982 to 90,150 in 1983 or 1.1 percent. Employment in the manufacturing sector showed a slight decrease of 0.4 percent from 31,980 to 31,860. Nonmanufacturing employment increased, however, from 57,160 in 1982 to 58,290 in 1983, a change of 2.0 percent. Employment is projected to increase from 159,500 in 1984 to 172,330 in 1990. This gain represents a change of 8.0 percent. Increases are expected in all the major occupational categories with the largest increases occurring in service workers, clerical workers, and managers and officials.

The population of Service Delivery Area 8 was 409,608 in 1980 and is expected to increase to 443,524 in 1984, a change of 8.3 percent. The composition of the projected population will be 215,134 males or 48.5 percent and 228,390 females or 51.5 percent. The proportion of minorities will be 9.7 percent or 43,075 persons. The population of 16-21 year olds is expected to decrease from 46,250 in 1980 to 42,457 in 1984, a change of 8.2 percent.

The civilian labor force in Service Delivery Area 8 will increase from 179,975 in 1980 to 201,930 in 1984 and represents a 12.2 percent change. Employment will increase from 168,255 in 1980 to 178,910 in 1984, and the unemployment rate will increase from 6.5 percent in 1980 to 11.4 percent in 1984. The labor force will consist of 112,226 males or 55.6 percent and 89,704 females or 44.4 percent. Minorities will be 8.8 percent or 17,726 persons. The number of 16-21 year olds in the 1980 labor force was 22,929 and will decrease to 22,780 in 1984, a change of 0.6 percent.

In 1980 the number of high school graduates was 118,070 in Service Delivery Area 8. High school dropouts accounted for 51,295 persons. Of this number, 5,960 were minorities. Single heads of household numbered 14,600; 79.2 percent were female and 20.8 percent were male. The number with a work disability was 23,610; 10,720 were female and 12,890 were male.

Unemployment insurance claimants in the area during fourth quarter 1983 were 52.2 percent female and 47.8 percent male. The majority of those drawing unemployment benefits were between the ages of 22 and 45, white, and had completed some high school. The occupations with the largest number of unemployed were clerical and sales, services, and structural work.

Description of the Area

Service Delivery Area 9

Service Delivery Area 9 consists of Nashville-Davidson County which serves as the hub of economic activity for middle Tennessee, southern Kentucky, and northern Alabama. Since 1963, Nashville and Davidson County have been under a metropolitan charter which established a single government for both city and county. For this reason the names Nashville and Davidson County are frequently used synonymously in regard to economic and political issues, including labor force and population data.

Nashville owes much of its success as a major distribution center to its central location and transportation facilities. Overland travel is served by three important interstate highways and an efficient railway system. The Cumberland River serves as a vital link to the Ohio and Mississippi Rivers. Geographic barriers to economic success do not appear to exist for Metropolitan Nashville.

Highlights and Conclusions

Service Delivery Area 9

The economic outlook for Service Delivery Area 9 is encouraging. Total nonagricultural wage and salary employment increased from 279,860 in 1982 to 228,540 in 1983, a change of 3.1 percent. Employment in manufacturing industries showed very little change. Employment in the nonmanufacturing sector increased from 232,930 in 1982 to 241,620 in 1983, a change of 3.7 percent. Employment is projected to increase from 316,900 in 1984 to 349,320 in 1990. This increase represents a 10.2 percent growth rate. All major categories are expected to increase with service workers, clerical workers, and managers and officials showing the greatest growth.

The total population for Service Delivery Area 9 is expected to increase from 477,811 in 1980 to 479,362 in 1984, a change of 0.3 percent. Females will comprise 52.6 percent or 252,341 persons and males will number 227,021 or 47.4 percent of the population. Minorities will number 115,445 or 24.1 percent of the total.

The civilian labor force of the area in 1980 was 241,894, and the projected 1984 labor force is 246,530, a 1.9 percent increase. Employment will increase slightly from 229,816 to 230,752 or 0.4 percent; the unemployment rate will increase from 5.0 percent in 1980 to 6.4 percent in 1984. Males will make up 52.1 percent of the labor force or 128,433 persons, and 118,097 persons will be females or 47.9 percent of the labor force. The proportion of minorities will be 20.9 percent or 51,549 persons. The civilian labor force for the 16-21 age group was 31,162 in 1980 and will decrease to 26,179 in 1984, a 16.0 percent change.

The number of high school graduates in Service Delivery Area 9 was 146,667 in 1980 with 61,829 persons listed as high school dropouts. Of those who were dropouts 25.5 percent or 15,773 were minorities. Single heads of household totaled 27,385 in 1980; 84.2 percent were female and 15.8 percent were male. Persons with a work disability totaled 27,047; 13,191 were male and 13,856 were female.

During the fourth quarter of 1983, unemployment insurance claimants were 53.0 percent male and 47.0 percent female. The majority had completed some high school, were white, and were between the ages of 22 and 45. The occupations with the highest number unemployed were services and clerical and sales.

Description of the Area

Service Delivery Area 10

Service Delivery Area 10 is composed of Coffee, Moore, Franklin, Rutherford, Bedford, and Lincoln counties. Rutherford County borders Davidson and Wilson counties on the north. Both Lincoln and Franklin counties border the Alabama state line and are the southern boundaries of Service Delivery Area 10.

Natural resources are similar in all the counties in the area with much of the region's land devoted to agriculture. An abundant supply of limestone rock and phosphate continues to be important to this area. Water is another abundant resource. The Duck and Elk rivers are major contributors to the lakes and reservoirs in Service Delivery Area 10. The topography varies from low mountainous to gently rolling terrain.

Highlights and Conclusions

Service Delivery Area 10

Economic indicators in Service Delivery Area 10 are favorable. Total nonagricultural wage and salary employment decreased 0.9 percent from 64,430 in 1982 to 63,870 in 1983. Manufacturing employment increased from 21,740 to 22,180, a change of 2.0 percent, while nonmanufacturing employment decreased from 42,690 to 41,690 or 2.3 percent. Employment is projected to increase from 98,690 in 1984 to 106,720 in 1990 or 8.1 percent. All occupations are expected to show growth in employment. The largest gains will be in service workers, clerical workers, and managers and officials.

Population in Service Delivery Area 10 is expected to increase to 228,439 in 1984 from the 1980 number of 213,261. This represents a change of 7.1 percent. The proportion of males will be 48.8 percent or 111,517 persons and females will total 116,922 or 51.2 percent. The number of minorities will be 21,268 or 9.3 percent of the population. The number of persons in the 16-21 age group will decrease from 25,821 in 1980 to 23,915 in 1984.

The civilian labor force in the area was 100,107 in 1980 and will reach 104,930 in 1984, a change of 4.8 percent. Employment is expected to grow from 93,526 to 93,702. The unemployment rate will increase from 6.6 percent in 1980 to 10.7 percent in 1984. Males will comprise 53.6 percent of the labor force or 56,239 persons while females will total 48,601 or 46.3 percent. Minorities will be 8.6 percent of the 1984 labor force or 9,054 persons. The number of 16-21 year olds in the 1980 labor force was 14,306. In 1984, the number of 16-21 year olds will decrease to 12,278 or 14.2 percent.

In 1980 Service Delivery Area 10 had 62,287 high school graduates and 28,917 persons who were listed as dropouts. Minority dropouts numbered 3,056 or 10.6 percent of the total number of dropouts. Single heads of household numbered 8,169; 78.8 percent of these were female and 21.2 percent were male. Persons with a work disability totaled 13,017; 52.9 percent were males and 47.1 percent were females.

In the fourth quarter of 1983, Service Delivery Area 10 unemployment insurance claimants were 54.6 percent females and 45.4 percent males. The majority of the claimants were white, with some high school education, and between the ages of 22 and 45. The occupations with the highest number unemployed were clerical and sales, structural work, and benchwork.

Description of the Area

Service Delivery Area 11

Eight counties extending from southern middle Tennessee to the Alabama border comprise Service Delivery Area 11. The area includes Giles, Hickman, Lawrence, Lewis, Marshall, Maury, Perry, and Wayne counties. Bounded by the Tennessee River on the west, the area has several rivers. Two natural resources are found in all the counties: sufficient water and good farm land. The smaller counties in the western portion of the service area have an abundance of timber.

The principal city in the area is Columbia, which serves as a regional health and shopping center. Postsecondary educational facilities include Columbia State Community College, Martin College, and Area Vocational Technical schools in Pulaski and Hohenwald. Recreational facilities include Henry Horton State Park in Marshall County and David Crockett State Park in Lawrenceburg.

Highlights and Conclusions

Service Delivery Area 11

The economic prospects for the eight counties that comprise Service Delivery Area 11 are improving since the recessionary period of 1982 that continued in 1983, and it is anticipated that this trend toward economic recovery will continue in the coming year. Nonagricultural employment increased from 47,980 in 1982 to 49,730 in 1983 or 3.6 percent. Employment in the manufacturing sector increased from 23,170 to 23,920 or 3.2 percent. Nonmanufacturing employment increased 4.0 percent from 24,810 to 25,810. Employment is projected to increase from 71,260 in 1984 to 78,878 in 1990, a change of 10.7 percent. All major occupational categories will show an increase in employment with service workers, crafts and kindred workers, and clerical workers increasing the most.

Projected 1984 population data for Service Delivery Area 11 shows 184,407 inhabitants, a 5.7 percent increase since the 1980 figure of 174,436. The number of males in the 1984 population will be 89,317 or 48.4 percent while females will be 51.6 percent or 95,090 persons. Minorities will number 17,006 or 9.2 percent. The number of 16 to 21 year olds will decrease from 18,511 in 1980 to 17,319 in 1984, a change of 6.4 percent.

In Service Delivery Area 11, the change in the labor force will be very small between 1980 and 1984. The 1980 total was 78,182 and the 1984 number will be 78,190. Of this 1984 number, 44.8 percent or 35,000 will be female and 43,190 or 55.2 percent will be male. Employment is expected to decrease from 1980 and the unemployment rate will increase from 7.9 percent in 1980 to 16.3 percent in 1984. The civilian labor force for the 16-21 age group is expected to decrease 15.2 percent from the 1980 total of 10,347 to 8,770 in 1984. The composition of this age group will be 89.6 percent white and 10.4 percent nonwhite. Males comprise 58.3 percent of the total, and 41.7 percent are female.

In 1980 the number of high school graduates in Service Delivery Area 11 was 45,721 and high school dropouts totaled 25,067. Minorities accounted for 2,339 of the dropouts or 9.3 percent. The number of single heads of household was 7,228; 80.8 percent were female and 19.2 percent were male. A total of 12,600 persons with a work disability reside in the area; 51.9 are male, 48.1 percent are female, and 34.1 percent are in the labor force.

During the fourth quarter of 1983, 46.4 percent of persons receiving unemployment insurance were male and 53.6 percent female. The majority of the claimants were white, had some high school education, and were in the 22 to 45 age group. The occupations with the highest unemployment were benchwork, clerical and sales, and services.

Description of the Area

Service Delivery Area 12

Service Delivery Area 12 encompasses over 7,000 square miles and includes 14 counties: Benton, Carroll, Chester, Decatur, Gibson, Hardeman, Hardin, Haywood, Henderson, Henry, McNairy, Madison, and Weakley. The area is bound on the west by Obion, Dyer, Lauderdale, Tipton, and Fayette counties; the north by the Kentucky state line; the east by Stewart, Houston, Humphreys, Perry, and Wayne counties; the south by the Alabama and Mississippi state lines.

The area has a variety of natural resources that contribute to a diverse economy including limestone, chert, timber, rich farm land, and large rivers such as the Tennessee and Big Sandy. The farm land yields many crops including sorghum, soybeans, wheat, corn, cotton, strawberries, and grazing for livestock. Crockett County has several companies that together have the largest frozen vegetable capability in the south.

Employment in the area is provided by manufacturing as well as nonmanufacturing industries. Major manufacturing industries include the following: apparel, food, furniture, electrical machinery, fabricated metals, lumber and wood products, nonelectrical machinery, paper, textiles, and stone, clay and glass. Nonmanufacturing employment is primarily in wholesale and retail trade, services, and government.

Camping, fishing, and other recreational facilities in the area are provided in part by several state parks: Chickasaw State Park, Nathan Bedford Forrest State Park, Natchez Trace State Park, Paris Landing State Park and Pickwick Landing State Park. Shiloh National Military Park is also located in Service Delivery Area 12.

Highlights and Conclusions

Service Delivery Area 12

A gradual upward trend in the economy is expected in Service Delivery Area 12. Total nonagricultural employment increased from 103,400 in 1982 to 106,510 in 1983 or 3.0 percent. Manufacturing employment increased from 41,600 to 43,410 or 4.4 percent, while nonmanufacturing employment increased from 61,800 to 63,100 or 2.1 percent. Employment for all occupations is projected to increase 7.3 percent from 141,860 to 152,230 between 1984 and 1990. The greatest increase will occur in services and clerical workers.

The population of Service Delivery Area 12 in 1980 was 377,662 and is expected to reach 393,727 in 1984. Women in 1984 will make up 52.1 percent or 205,072 of the total population. Whites will total 81.6 percent or 321,326 persons; 19.2 percent or 72,402 of the population will be nonwhite. Of the nonwhite population, 93.3 percent will be black. The population of 16-21 year olds will decrease from 41,921 to 36,975.

The civilian labor force in 1984 for Service Delivery Area 12 is expected to average 181,060 persons. This represents a growth of 19,149 or 11.8 percent over the 1980 figure of 161,911. Total employment is expected to climb from 148,378 in 1980 to 156,979 in 1984. The projected unemployment rate for Service Delivery Area 12 in 1984 is 13.3 percent, as unemployment is expected to increase from 13,533 in 1980 to 24,081 in 1984. The number of 16-21 year olds in the labor force will decrease from 21,066 in 1980 to 18,810 in 1984; 80.9 percent will be white, 47.2 percent female, and 19.1 percent nonwhite.

According to 1980 Census information, high school dropouts in Service Delivery Area 12 numbered 56,688 with a nonwhite proportion of 18.7 percent.

High School graduates totaled 31,113. The number of single heads of household was 17,093; 81.7 percent were headed by females and 18.3 percent were males. Of 27,364 persons with a work disability, 51.4 percent were male. A comparison of those receiving unemployment insurance benefits during 1984 indicated that 52.3 percent were female, 73.2 percent were white, 78.2 percent had at least a ninth grade education, and 64.1 percent were between the ages of 22 and 45. Benchwork occupations and clerical and sales has the highest unemployment percentages.

Description of the Area

Service Delivery Area 13

Service Delivery Area 13 encompasses almost 2,200 square miles and is composed of five counties: Dyer, Lake, Lauderdale, Obion, and Tipton. Service Delivery Area 13 is bound on the west by the Mississippi River; on the north by the Kentucky state line; on the east by Weakley, Gibson, Crockett, and Haywood counties; and on the south by Fayette and Shelby counties. All counties in the area were designated labor surplus areas by the Department of Labor in February, 1983.

The land in the area is gently rolling and is rich in delta soil. Large quantities of soybeans, wheat, corn, and cotton are produced. Livestock is also a source of income.

Employment in the area is provided by many industries: apparel, fabricated metals, food, furniture, rubber, and transportation equipment. Nonmanufacturing employment is centered in wholesale and retail trade, government, and services. Recreational facilities are provided in part by Reelfoot Lake in Lake county.

Highlights and Conclusions

Service Delivery Area 13

A gradual upward trend in the economy is expected for Service Delivery Area 13. Total nonagricultural wage and salary employment increased from 34,350 in 1980 to 35,880 in 1984 or 4.5 percent. Manufacturing employment increased from 15,370 to 16,500, a change of 7.4 percent. Employment in the nonmanufacturing sector increased from 18,980 to 19,380 or 2.1 percent. Total projected employment will increase 6.0 percent between 1984 and 1990 from 49,820 to 52,820. The largest increases will be in services and clerical workers; however, all major categories will experience some growth.

The population of Service Delivery Area 13 in 1980 was 132,384 and is expected to reach 139,771 in 1984. Women will make up 52.0 percent of the total population. Whites will total 81.0 percent, while the black percentage of the nonwhite total will be 93.6 percent.

The average civilian labor force for Service Delivery Area 13 is expected to reach 62,320 in 1984, a 13.3 percent increase over the 1980 total of 54,992. Employment will increase from 50,639 to 55,278; however, the unemployment rate is also expected to increase from 7.9 percent to 11.3 percent. The number of 16-21 year olds in the labor force will increase from 6,853 to 7,233 or 5.5 percent. In 1984 83.1 percent of this group will be white. The percentage of males and females will be almost equal with males being 54.3 percent of the total.

According to 1980 Census information, high school dropouts in Service Delivery Area 13 totaled 20,015 with a nonwhite percentage of 19.4. High school graduates totaled 32,581. Female heads of household comprised 81.3 percent of the 6,058 single heads of household. The number of work disabled persons in the labor force was 9,477; males were 46.8 percent of this number.

During fourth quarter 1983, 53.6 percent of all claimants receiving unemployment benefits in Service Delivery Area 13 were female, 78.1 percent were white, 75.2 percent had at least a ninth grade education, and 64.6 percent were within the 22-45 age bracket. Machine trades occupations and clerical and sales workers had the highest percentages of claimants.

Description of the Area

Service Delivery Area 14

Service Delivery Area 14, which encompasses 1,477 square miles, consists of Shelby and Fayette counties located in southwest Tennessee. The service delivery area is bordered on the north by Tipton and Haywood counties, on the east by Hardeman County, on the south by the state of Mississippi, and on the west by the Mississippi River, which separates the area from the state of Arkansas. Shelby County is an urban center; Fayette County is basically rural in character.

In 1980 the population of the service delivery area was 802,400; the population of Shelby County was 777,100 compared to 25,300 persons in Fayette County. Shelby County with 52.3 percent of the land area had 96.8 percent of the population. The service delivery area had 17.5 percent of Tennessee's total population. The largest city in the service delivery area is Memphis, which had a population of 846,200 in 1980; this was 80.5 percent of the service delivery area population.

The economy of the area is diversified, but part of the labor force is underused because of the lack of enough semi-skilled jobs in the manufacturing sector. The industries with the largest number of employees are trade, services and government.

Highlights and Conclusions

Service Delivery Area 14

The economic outlook for Service Delivery Area 14 is uncertain. The annual average nonagricultural wage and salary employment increased from 337,010 in 1982 to 339,110 in 1983, a change of 0.6 percent. Manufacturing employment decreased 6.6 percent from 52,420 to 48,980. Employment in the nonmanufacturing sector increased by 5,540 between 1982 and 1983, a change of 1.9 percent. Employment is projected to increase from 402,600 in 1984 to 447,630 in 1990, a change of 11.2 percent. All major occupational categories are expected to increase with service workers, clerical workers, and managers and officials showing the largest gains.

The total population of Service Delivery Area 14 will be 805,611 in 1984, an increase of 0.4 percent over the 1980 total of 802,418. Minorities account for 44.4 percent of the total population; blacks comprise 98.0 percent of the minority population. Males account for 46.9 percent of the total population; 43.2 percent of the males are black. Females account for 53.1 percent of the total population; 43.8 percent of the females are black.

The civilian labor force in Service Delivery Area 14 will average 376,240 in 1984; this is an increase of 4.8 percent over the 1980 total of 359,132. In 1984, whites will account for 60.9 percent of the civilian labor force and nonwhites 39.1 percent. Males account for 52.1 percent of the labor force and females 47.9 percent. The 16-21 age group will represent 11.7 percent of the labor force in 1984. The number of 16-21 year olds in the labor force will decrease from 44,117 in 1980 to 43,932 in 1984, a change of 0.4 percent. Total employment will average 343,500 in 1984, an increase of 3.8 percent over 1980. Although employment will increase moderately in 1984, unemployment will average

32,733 persons unemployed or 8.7 percent of the civilian labor force, which is higher than the 1980 unemployment level of 7.9 percent.

In 1980 100,352 persons had not completed high school in the area and 237,306 persons were high school graduates. Minorities accounted for 51,643 of the high school dropouts or 51.5 percent. Approximately 44,800 persons in the age range 16 through 64 had some degree of work disability in 1980. Over 25,700 of these persons were not able to work, but almost 4,300 who were able to work were not in the labor force. Nearly 14,800 of the work disabled were in the labor force; 61.6 percent of these were male. In 1980 single heads of household numbered 53,925; females accounted for 84.2 percent of this total.

During fourth quarter 1983, unemployment insurance claimants were 56.0 percent female and 44.0 percent male. The majority of the claimants were black and had between 9 and 12 years of education. Most of the claimants were between 22 and 45 years of age. Clerical and sales and services were the occupations with the highest percentages of claimants.
